SUMMARY

Senior Data Engineer with 5+ years of professional software and data experience. Specializing in data pipelines, ETL/ELT workflows, orchestration, modeling, reliability, and platform operations. Proven track record in building large-scale commercial data pipelines and robust cloud infrastructure in Berlin and beyond.

TECHNICAL SKILLS

Languages: Python, SQL, Java, JavaScript, C++
Data & Orchestration: Dagster, Airflow, dbt, DLT, PySpark, Pandas
Cloud & Infrastructure: Terraform, Supabase, Azure, AWS, Google Cloud
Emerging Tech: LLM architecture, agent frameworks (CrewAI, LangGraph, OpenClaw, n8n)
Other: Network and privacy hardening, PostgreSQL, MongoDB, REST APIs, Git

EXPERIENCE

- GROPYUS**
Data Engineer

Berlin, Germany
Aug 2022 – Present

 - Designed and optimized data pipelines for KUKA robots, enabling real-time production insights and robotics data work.
 - Streamlined manufacturing data flows between robotic systems and enterprise platforms, improving automation efficiency.
 - Operated platform infrastructure utilizing Dagster, Airflow, dbt, DLT, Azure, and Python.
- Sigmoid**
Software Development Engineer

Bengaluru, India
Jun 2021 – Jul 2022

 - Built and maintained ETL pipelines for processing large-scale commercial sales data from Colgate-Walmart.
 - Automated reporting and analytics pipelines using Python, PySpark, GCP, AWS, Pandas, Terraform, and Airflow.
- Amdocs**
Software Engineer

Pune, India
Jun 2019 – Jun 2021

 - Developed backend features and integrations for Comcast CRM, tracking business needs and process automation.
 - Led design, wireframing, and backend implementation of new modules using Java, Spring, and REST/SOAP APIs.

SELECTED PROJECTS & INTERESTS

- SampadAI:** Built a privacy-conscious personal-finance platform, integrating secure data pipelines and user data protection.
- Quantitative Financial Systems:** Explored financial asset-management models and quantitative data workflows.
- LLM & Agentic Workflows:** Developed experimental projects using LLM architecture, CrewAI, LangGraph, OpenClaw, and n8n to automate complex data tasks.
- Cloud Architecture:** Designed systems leveraging Supabase, network hardening, and cloud-database architectures.
