Summary

Data Engineer with 7+ years of experience building and supporting production data and backend systems. Hands-on with Python, distributed data processing, cloud delivery, infrastructure as code, and containerized releases. Current work spans CDC, lakehouse, workflow orchestration, and graph data for robotic manufacturing. Also builds independent products and AI-assisted workflows with automated deployment, health checks, approval gates, and rollback.

Experience

GROPYUS

Berlin, Germany

Data Engineer

Aug 2022 - Present

- Build and maintain Python data pipelines across CDC, lakehouse, and graph database systems that connect robotic manufacturing data with enterprise workflows.
- Develop and orchestrate workflows with Dagster, Airflow, dbt, and DLT, and release tested changes through Azure CI/CD.

Sigmoid

Bengaluru, India

Software Development Engineer

Jun 2021 - Jul 2022

- Built Python and Apache Spark data pipelines that transformed commercial sales data into repeatable reporting datasets.
- Automated and deployed data workflows with Airflow and Terraform across Google Cloud and AWS.

Amdocs

Pune, India

Software Engineer

Jun 2019 - Jun 2021

- Took CRM backend features from requirements and wireframes through implementation and integration.
- Built and supported enterprise service integrations in Java and Spring using REST and SOAP APIs.

Selected AI and Platform Work

Regulation Check | EU AI Act readiness platform

Independent product

- Built and deployed a FastAPI and Supabase PostgreSQL product with deterministic screening, tenant isolation, and auditable evidence.
- Set up GitHub Actions, pinned Docker releases, deployment approvals, startup retry, health checks, and automatic rollback to the last known good version.

Pasin | Agent workflow orchestration

Independent project

- Designed an agent workflow that plans scope, runs tools in sandboxes, keeps durable status, checks results, pauses for review, and creates rollback points in Git.

Technical Skills

Languages: Python, SQL, Java, JavaScript

Data and orchestration: Apache Spark, PySpark, Pandas, CDC, ETL/ELT, Dagster, Airflow, dbt, DLT, lakehouse architectures

Cloud and delivery: Microsoft Azure, AWS, Google Cloud, Terraform, Docker, GitHub Actions, CI/CD, Git

Applications and storage: FastAPI, Spring, PostgreSQL, graph databases, MySQL, MongoDB, REST APIs, SOAP APIs

AI workflow delivery: Agent orchestration, sandboxed execution, validation gates, human review, release health checks, rollback

Education and Recognition

Birla Institute of Technology Mesra

India

Bachelor of Engineering in Computer Science

Aug 2015 - Jun 2019

Facebook PyTorch Scholar | Infosys HackWithInfy Top 200 | Google Tech Intern Connect invitee (2018)
