PROFILE

Senior Data Engineer with 7+ years building manufacturing data platforms, consumer-goods sales pipelines, and CRM backend services. At GROPYUS, develop Python and SQL pipelines for production planning, element lifecycle tracking, reporting, and manufacturing operations. Hands-on with orchestration, CDC, cloud delivery, infrastructure as code, feature flags, and production observability.

EXPERIENCE

Data Engineer Aug 2022 - Present
GROPYUS Berlin, Germany

- Build and operate Python and SQL ETL/ELT pipelines that support production planning, element lifecycle tracking, manufacturing reporting, and operational monitoring.
- Orchestrate CDC, PostgreSQL, lakehouse, and graph database workflows with Dagster, Airflow, dbt, and DLT, releasing tested changes through Azure CI/CD.
- Apply anomaly detection to data pipelines and surface operational issues through Prometheus metrics, Grafana dashboards, and alerts, helping improve robot and manufacturing efficiency.
- Work with Terraform, Docker, Kubernetes, and Unleash feature flags to deliver platform changes and control feature releases.

Software Development Engineer Jun 2021 - Jul 2022
Sigmoid Bengaluru, India

- Built Python, PySpark, and Pandas ETL pipelines that prepared consumer-goods sales data for reporting and analysis.
- Scheduled and operated Airflow workflows on Google Cloud, managed infrastructure with Terraform, and persisted pipeline data in MySQL.

Software Engineer Jun 2019 - Jun 2021
Amdocs Pune, India

- Delivered CRM backend features in Java and Spring, taking requirements through implementation and system integration.
- Developed REST and SOAP service integrations backed by Oracle databases for CRM workflows.

SELECTED PROJECT

Regulation Check | EU AI Act readiness application *Independent project*

- Built and deployed a FastAPI and PostgreSQL application with deterministic EU AI Act screening and evidence workflows.
- Packaged the service with Docker and automated testing and deployment through GitHub Actions.

SKILLS

Languages and frameworks: Python, SQL, Java, Spring, FastAPI

Data engineering: ETL/ELT, CDC, Dagster, Airflow, dbt, DLT, PySpark, Pandas, lakehouse

Cloud and delivery: Microsoft Azure, Google Cloud, Terraform, Docker, Kubernetes, GitHub Actions, CI/CD, Git

Observability and controls: Prometheus, Grafana, alerting, Unleash feature flags

Storage and interfaces: PostgreSQL, MySQL, Oracle, graph databases, REST APIs, SOAP APIs

EDUCATION

Birla Institute of Technology Mesra India
Bachelor of Engineering in Computer Science Aug 2015 - Jun 2019

RECOGNITION

Facebook PyTorch Scholar (2018) | Infosys HackWithInfy Top 200 | Google Tech Intern Connect invitee (2018)
