EDUCATION

- **Birla Institute of Technology Mesra** Ranchi, India
Bachelor of Engineering in Computer Science *Aug. 2015 – Jun. 2019*

EXPERIENCE

- **GROPYUS** Aug 2022 - Present
Data Engineer
 - **Location:** Berlin, Germany
 - **Works:** Designed and optimized real-time data pipelines for KUKA robots, enabling production insights. Improved automation efficiency by streamlining robotic-to-enterprise data flows.
 - **Technologies:** Dagster, Airflow, DBT, DLT, Microsoft Azure, Python, etc
- **Sigmoid** June 2021 - July 2022
Software Development Engineer
 - **Location:** Bengaluru, India
 - **Works:** Currently working on end to end application where the application is responsible to generate reports based on the sales data getting generated by Colgate in Walmart. Working on end-to-end EVR, CBR, Net Sales data pipeline.
 - **Technologies:** Python, PySpark, Google Cloud, AWS, Pandas, Terraform, Jira, AirFlow, REST APIs, etc
- **Amdocs** June 2019 - June 2021
Software Engineer
 - **Location:** Pune, India
 - **Works:** I am in the team that was responsible for Comcast CRM, which is a piece of customer relationship management software. I led the effort to build a feature that allows users to easily keep track of business needs. My responsibilities included the initial research, planning and managing the project, designing the feature, creating wireframes, and writing out our specs.
 - **Technologies:** Java, Spring, SOAP APIs, REST APIs, etc

RELEVANT COURSES

- **Social Networks (Elite):** Covered topics like Graph Theory, Strong and Weak ties, Homophily, Social Influence, Structure of web, Link Analysis, Web search, Link Prediction, Diffusion Behaviour and The small world phenomenon.
- **Design and Analysis of Algorithm:** Learned various concepts related to Sorting, Searching, Divide and conquer, Greedy approach, Dynamic Programming.
- **Introduction to Modern Application Development, IMAD (Elite + Top 5%):** Covered topics like Introduction to the Internet, Building a web application Databases, Performance and security, Building a mobile application.

SKILL SETS

- **Languages:** C, C++, Java, JavaScript, Python
- **Tools/Framework:** Airflow, Dagster, DBT, DLT, Microsoft Azure, Terraform, SQL, Git, NodeJS, Pandas, Google Cloud, MongoDB, Unix
- **Strongest Areas:** Data Structures, Algorithms, Database management

ACHIEVEMENTS & AWARDS

- **Recipient:** Facebook PyTorch Challenge Scholarship, 2018.
- **Infosys HackWithInfy:** Among top 200 in multiple round coding competition.
- **Google Tech Intern Connect:** I was among the 280 students who got selected to attend the Google Tech Intern Connect event at Google Gurgaon office.
- **Sapient Triathlon:** Secured 19th position overall among 6390 participants.
- **Distinguished Fellow:** For superior performance as a Product Development Intern at Hasura Technologies.
- **Recipient:** Google India Challenge Scholarship, 2018.
- **Pre-finalist:** CodeChef Snackdown 2017, an international coding competition. Secured 615th rank overall.
