Summary

Data Engineer with 7+ years building production data pipelines, orchestration, cloud workflows, and backend integrations. Builds agentic engineering workflows with Claude Code and Pasin, combining model-driven execution with scoped authority, deterministic validation, and human review. Strong in Python, SQL, ETL/ELT, Airflow, Dagster, dbt, cloud platforms, and infrastructure as code.

Applied AI Engineering

Pasin — Agentic Workflow Orchestration

Independent project

- Designed a workflow for planned task scope, provider routing, sandboxed execution, durable status, and budget-aware agent operations.
- Established deterministic acceptance checks, Codex review gates, evidence records, and rollback-friendly Git milestones before completion.

Claude Code Agent Workflows

Current practice

- Use Claude Code across repository discovery, implementation, testing, and review, with explicit acceptance criteria and human approval.
- Build auditable agent workflows around context design, tool boundaries, validation gates, failure handling, and evidence-backed outcomes.

Experience

GROPYUS

Berlin, Germany

Data Engineer

Aug 2022 – Present

- Design and optimise Python data pipelines connecting robotic manufacturing systems with enterprise data flows for production insight.
- Build and orchestrate maintainable workflows using Dagster, Airflow, dbt, DLT, and Microsoft Azure.

Sigmoid

Bengaluru, India

Software Development Engineer

Jun 2021 – Jul 2022

- Built ETL pipelines that transformed commercial sales data into repeatable reporting datasets using Python, PySpark, and Pandas.
- Orchestrated and deployed data workflows with Airflow, Terraform, Google Cloud, and AWS.

Amdocs

Pune, India

Software Engineer

Jun 2019 – Jun 2021

- Delivered CRM backend capabilities from requirements and wireframes through implementation and integration.
- Built enterprise integrations and service interfaces using Java, Spring, REST APIs, and SOAP APIs.

Technical Skills

AI and agents: Claude Code, agent orchestration, context design, tool use, validation gates, human-in-the-loop review

Languages: Python, SQL, Java, JavaScript

Data engineering: ETL/ELT, Airflow, Dagster, dbt, DLT, PySpark, Pandas, data pipelines

Cloud and delivery: Microsoft Azure, AWS, Google Cloud, Terraform, Git, Unix

Databases and interfaces: PostgreSQL, MySQL, MongoDB, REST APIs, SOAP APIs

Education

Birla Institute of Technology Mesra

India

Bachelor of Engineering in Computer Science

Aug 2015 – Jun 2019

Recognition

Facebook PyTorch Challenge Scholar (2018) | Infosys HackWithInfy Top 200

Google Tech Intern Connect invitee (2018)
