

Saurabh Shubham

DATA ENGINEER | AGENTIC AI & DATA PLATFORMS

Berlin, Germany | saurabh.friday@gmail.com

linkedin.com/in/saurabh-shubham | github.com/Saurabh3333 | saurabh3333.github.io

Summary

Data Engineer with 7+ years building production data pipelines, orchestration, cloud workflows, and backend integrations. Builds agentic products with controlled deployment, deterministic validation, and human review. Strong in Python, SQL, CDC, ETL/ELT, Dagster, dbt, lakehouse architectures, CI/CD, cloud platforms, and infrastructure as code.

Applied AI Engineering

Regulation Check — EU AI Act Readiness Platform

Independent product

- Built and deployed a FastAPI and Supabase PostgreSQL product through a Looper-based agentic workflow, combining deterministic screening, tenant isolation, and auditable evidence.
- Engineered a self-healing release path with GitHub Actions CI/CD, commit-pinned Docker images, approval-gated automatic deployment, startup retry, production health checks, and last-known-good rollback.

Pasin — Agentic Workflow Orchestration

Independent project

- Designed multi-provider agent operations with planned scope, sandboxed execution, durable status, deterministic acceptance checks, review gates, and rollback-friendly Git milestones.

Experience

GROPYUS

Berlin, Germany

Data Engineer

Aug 2022 – Present

- Design and optimise Python pipelines across CDC, lakehouse, and graph-database architectures, connecting robotic manufacturing systems with enterprise data flows.
- Model and orchestrate Dagster, Airflow, dbt, and DLT workflows; deliver tested changes through Azure CI/CD.

Sigmoid

Bengaluru, India

Software Development Engineer

Jun 2021 – Jul 2022

- Built ETL pipelines that transformed commercial sales data into repeatable reporting datasets using Python, PySpark, and Pandas.
- Orchestrated and deployed data workflows with Airflow, Terraform, Google Cloud, and AWS.

Amdocs

Pune, India

Software Engineer

Jun 2019 – Jun 2021

- Delivered CRM backend capabilities from requirements and wireframes through implementation and integration.
- Built enterprise integrations and service interfaces using Java, Spring, REST APIs, and SOAP APIs.

Technical Skills

AI and agents: Claude Code, Looper workflows, agent orchestration, context design, validation gates, human-in-the-loop review

Languages: Python, SQL, Java, JavaScript

Data engineering: CDC, ETL/ELT, Dagster, Airflow, dbt, DLT, PySpark, lakehouse architectures

Cloud and delivery: Microsoft Azure, AWS, Google Cloud, CI/CD, Docker, GitHub Actions, Terraform, Git

Databases and interfaces: PostgreSQL, graph databases, MySQL, MongoDB, REST APIs, SOAP APIs

Education

Birla Institute of Technology Mesra

India

Bachelor of Engineering in Computer Science

Aug 2015 – Jun 2019

Recognition

Facebook PyTorch Scholar | Infosys HackWithInfy Top 200 | Google Tech Intern Connect invitee (2018)
